

Montréal Process Criteria and Indicators

(Fourth Edition, 2015)

Criterion 1: Conservation of Biological Diversity

1.1. Ecosystem Diversity

- 1.1.a Area and percent of forest by forest ecosystem type, successional stage, age class, and forest ownership or tenure
- 1.1.b Area and percent of forest in protected areas by forest ecosystem type, and by age class or successional stage
- 1.1.c Fragmentation of forests

1.2. Species Diversity

- 1.2.a Number of native forest-associated species
- 1.2.b Number and status of native forest-associated species at risk, as determined by legislation or scientific assessment
- 1.2.c Status of on site and off site efforts focused on conservation of species diversity

1.3. Genetic Diversity

- 1.3.a Number and geographic distribution of forest-associated species at risk of losing genetic variation and locally adapted genotypes
- 1.3.b Population levels of selected representative forest-associated species to describe genetic diversity
- 1.3.c Status of on site and off site efforts focused on conservation of genetic diversity

Criterion 2: Maintenance of Productive Capacity of Forest Ecosystems

- 2.a Area and percent of forest land and net area of forest land available for wood production
- 2.b Total growing stock and annual

- increment of both merchantable and non-merchantable tree species in forests available for wood production
- 2.c Area, percent, and growing stock of plantations of native and exotic species
- 2.d Annual harvest of wood products by volume and as a percentage of net growth or sustained yield
- 2.e Annual harvest of non-wood forest products

Criterion 3: Maintenance of Forest Ecosystem Health and Vitality

- 3.a Area and percent of forests affected by biotic processes and agents (e.g., disease, insects, invasive alien species) beyond reference conditions.
- 3.b Area and percent of forest affected by abiotic agents (e.g., fire, storm, land clearance) beyond reference conditions

Criterion 4: Conservation and Maintenance of Soil and Water Resources

4.1. Protective Function

- 4.1.a Area and percent of forest whose designation or land management focus is the protection of soil or water resources

4.2. Soil

- 4.2.a Proportion of forest management activities that meet best management practices or other relevant legislation to protect soil resources
- 4.2.b Area and percent of forest land with significant soil degradation

4.3. Water

- 4.3.a Proportion of forest management activities that meet best management practices, or other relevant legislation, to protect water related resources
- 4.3.b Area and percent of water bodies, or stream length, in forest areas with significant change in physical, chemical, or biological properties from reference conditions

Criterion 5: Maintenance of Forest Contribution to Global Carbon Cycles

- 5.a Total forest ecosystem carbon pools and fluxes
- 5.b Total forest product carbon pools and fluxes
- 5.c Avoided fossil fuel carbon emissions by using forest biomass for energy

Criterion 6: Maintenance and Enhancement of Long-term Multiple Socio-economic Benefits

6.1. Production and Consumption

- 6.1.a Value and volume of wood and wood products production, including primary and secondary processing
- 6.1.b Value of non-wood forest products produced or collected
- 6.1.c Revenue from forest based ecosystem services
- 6.1.d Total and per capita consumption of wood and wood products in round wood equivalents
- 6.1.e Total and per capita consumption of non-wood forest products
- 6.1.f Value and volume in round wood equivalents of exports and

- imports of wood products
- 6.1.g Value of exports and imports of non-wood forest products
- 6.1.h. Exports as a share of wood and wood products production, and imports as a share of wood and wood products consumption
- 6.1.i Recovery or recycling of forest products as a percent of total forest products consumption

6.2. Investment in the Forest Sector

- 6.2.a Value of capital investment and annual expenditure in forest management, wood and non-wood forest product industries, forest-based environmental services, recreation, and tourism
- 6.2.b Annual investment and expenditure in forest-related research, extension and development, and education

6.3. Employment and Community Needs

- 6.3.a Employment in the forest sector
- 6.3.b Average wage rates, annual average income and annual injury rates in major forest employment categories
- 6.3.c Resilience of forest-dependent communities
- 6.3.d Area and percent of forests used for subsistence purposes
- 6.3.e Distribution of revenues derived from forest management

6.4. Recreation and Tourism

- 6.4.a Area and percent of forests available and/or managed for public recreation and tourism
- 6.4.b Number, type, and geographic distribution of visits attributed to

- recreation and tourism and related to facilities available

6.5. Cultural, Social, and Spiritual Needs and Values

- 6.5.a Area and percent of forests managed primarily to protect the range of cultural, social, and spiritual needs and values
- 6.5.b The importance of forests to people

Criterion 7: Legal, Institutional, and Economic Framework for Forest Conservation and Sustainable Management

- 7.1.a Legislation and policies supporting the sustainable management of forests
- 7.1.b Cross sectoral policy and programme coordination
- 7.2.a Taxation and other economic strategies that affect sustainable management of forests
- 7.2.b Development and application of research and technologies for the sustainable management of forests
- 7.2.c Partnerships to promote the sustainable management of forests
- 7.2.d Public participation and conflict resolution in forest-related decision making
- 7.2.e Monitoring, assessment, and reporting on progress towards sustainable management of forests
